PROFESSIONAL SUMMARY

Full Stack Developer with nearly four years of experience building web applications and digital platforms across financial services, digital services, sanitary products, heavy equipment distribution, and F&B. Experienced in backend development, system integration, performance optimization, deployment, and application maintenance. Adaptable and solution-oriented, with the ability to work independently and collaborate across project teams. Track record of improving delivery speed, reducing project costs, and maintaining implementation quality through go-live. Currently expanding into AI Engineering, data science, and cloud computing.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, SQL, HTML, CSS

Frameworks and UI: Laravel, React, Next.js, TanStack Start, Livewire, Tailwind CSS, shadcn/ui, Bootstrap

Backend and data: Node.js, MySQL, PostgreSQL, Prisma, Redis, REST APIs, S3 object storage, Midtrans, iPaymu

DevOps and tools: Git, GitHub Actions, Docker, Nginx, Ansible, Linux, Cloudflare, Postman, k6

Engineering: Web performance, SEO, database encryption, AI-assisted development

Current learning: AI architecture, data engineering, applied machine learning, model evaluation, deep learning, transformers and LLM fundamentals, Gemini API, Google Cloud

Languages: Bahasa Indonesia; English (Basic)

PROFESSIONAL EXPERIENCE

Founder & Software Engineer | Linkara.id | Jun 2026 – Present

- Built and launched Linkara.id, a web-based digital placement platform that has reached 120 registered users.
- Owned product planning, UI/UX, architecture, software development, deployment, maintenance, and early-stage SEO and social media marketing activities.

Tech stack: TanStack Start, MySQL, Prisma, Redis, shadcn/ui, Tailwind CSS, Zod, Zustand, Midtrans, iPaymu, S3 object storage, GitHub Actions

Full Stack Developer | Dgra Komunika | Apr 2026 – Jun 2026

Project-Based Contract

- Developed asix.id, a company profile website built with Next.js, Strapi CMS, and MySQL.
- Applied caching, minification, and image optimization and supported deployment management on Linux servers.

Tech stack: Next.js, React, Tailwind CSS, Strapi CMS, MySQL, Docker, Linux, Ansible

Full Stack Developer | PT Optify Intermedia Pratama | Oct 2022 – Mar 2026

Full-time, Permanent

- Developed and maintained client websites, web applications, landing pages, and new features across multiple projects.
- As the sole developer, delivered the modular BCA Life E-Recruitment system from planning through go-live within two months using Laravel, Livewire, MySQL, and Tailwind CSS.
- Reduced the JOMOO website delivery timeline from 60 to 30 working days through an AI-assisted development workflow with Cursor; avoided the planned hiring of 2 additional freelance software engineers and reduced estimated project cost by 60–70%.
- Handled bug fixing and technical issues through root-cause analysis and applied caching, minification, and image optimization to improve access performance and server resource efficiency.

Tech stack: PHP, Laravel, Python, React, Next.js, Tailwind CSS, MySQL, Linux server

Freelance Web Developer | PT Alsad Indo Bisnis Jaya | 2024

- Developed a business website for a micro F&B business.

Virtual Internship – Full Stack and Backend Developer | Investree | May – Jul 2022

- Completed a virtual internship focused on full-stack and backend development.

Tech stack: Laravel, Java Spring Boot, PostgreSQL

PROFESSIONAL DEVELOPMENT

AI Engineering Bootcamp | ReWork Academy | 15 Aug 2026 – 27 Oct 2026

In progress

- Practice-based curriculum covering Python and data pipelines, machine learning fundamentals, neural networks and transformers, embeddings and semantic search, prompt engineering, RAG, agentic AI, backend APIs, cloud deployment, observability, cost optimization, security, and production AI system design.
- Technologies covered: Python, pandas, NumPy, Git/GitHub, Gemini API, Google AI Studio, Hugging Face, Pinecone, FAISS, LangChain, LangGraph, FastAPI, Pydantic, Docker, Google Cloud Run, Railway, LangSmith, and Redis.

Selected Google Cloud Skill Badges: Build Infrastructure with Terraform on Google Cloud; Deploy Kubernetes Applications on Google Cloud; Develop Serverless Applications on Cloud Run; Implement CI/CD Pipelines on Google Cloud; Derive Insights from BigQuery Data; Prompt Design in Vertex AI; Enhance Gemini Model Capabilities.

EDUCATION

Bachelor of Engineering (S.T.) | Universitas Brawijaya | Aug 2017 – Jul 2021

Major: Electrical Engineering, Electronics concentration | GPA 3.68/4.00

CERTIFICATIONS AND TRAINING

HackerRank: Problem Solving (Basic), React (Basic), SQL (Basic) | Sep 2022

Fullstack Developer Bootcamp: Metroddata Academy x KOMINFO | Sep – Oct 2022

Additional training: Progate React and JavaScript, Fundamental Git; Dicoding Front-End Web, Web Programming, and Kotlin.

PROJECT PORTFOLIO

- [Linkara](#) - Website development
- [ASIX](#) - Website development
- [JOMOO Indonesia](#) - Website development and maintenance
- [BCA Life](#) - Website development and maintenance
- [BCA Life E-Recruitment](#) - Web application development
- [SOSIAGO](#) - Web application maintenance
- [Traktor Nusantara](#) - Website maintenance
- [Swadaya Harapan Nusantara](#) - Website maintenance
